

Intimate Care Policy
April 2017 (Reviewed October 2020)

The care of our children is central to the aims, ethos and teaching programmes in Stillness Infant School and we are committed to developing positive and caring attitudes in our children. It is our intention to develop independence in each child, however there will be occasions when help is required.

The principles and procedures apply to everyone involved in the intimate care of children. 'Intimate care may be defined as an activity required to meet the personal care needs of each individual child in partnership with the parent, carer and the child.' In school this may occur on a regular basis or during a one-off incident.

Stillness Infant School is committed to ensuring that all staff responsible for the intimate care of children will undertake their duties in a professional manner at all times. We recognise that there is a need to treat all our children with respect when intimate care is given. No child should be attended to in a way that causes distress or pain, and adults and staff must be sensitive to each child's individual needs.

Intimate care is any care which involves one of the following:

1. Assisting a child to change his/her clothes
2. Changing or washing a child who has soiled him/herself
3. Assisting with toileting issues
4. Supervising a child involved in intimate self-care
5. Providing first aid assistance
6. Providing comfort to an upset or distressed child
7. Feeding a child
8. Providing oral care to a child
9. Assisting a child who requires a specific medical procedure and who is not able to carry this out unaided.

**** In the case of a specific procedure only a person suitably trained and assessed as competent should undertake the procedure e.g. the administration of insulin.***

Parents have the responsibility to advise the school of any known intimate care needs relating to their child

Principles of Intimate Care

The following are the fundamental principles of intimate care upon which our policy guidelines are based:

- ◆ Every child has a right to be safe;
- ◆ Every child has the right to personal privacy;
- ◆ Every child has the right to be valued as an individual;
- ◆ Every child has the right to be treated with dignity and respect;
- ◆ All children have the right to be involved and consulted in their own intimate care to the best of their abilities;
- ◆ All children have the right to express their views on their own intimate care and to have their views taken into account; and
- ◆ Every child has the right to have levels of intimate care that are appropriate and consistent.

Assisting a child to change his/her clothes

This is more common in our Foundation Stage. On occasions an individual child may require some assistance with changing if, for example, he/she has an accident at the toilet, gets wet outside, or has vomit on his/her clothes etc.

Staff will always encourage children to attempt undressing and dressing unaided. However, if assistance is required this will be given.

Staff will always ensure where possible that they have a colleague in attendance when supporting dressing/undressing and will always give the child the opportunity to change in private, unless the child is in such distress that it is not possible to do so.

If staff are concerned in any way parents will be sent for and asked to assist their child and informed if the child becomes distressed.

Changing a child who has soiled him/herself

If a child soils him/herself in school a professional judgement has to be made whether it is appropriate to change the child in school, or request the parent/carer to collect the child for changing. In either circumstance the child's needs are paramount and he/she should be comforted and reassured throughout. The following guidelines outline our procedures but we will also seek to make age appropriate responses.

- ◆ The child will be given the opportunity to change his / her underwear in private and carry out this process themselves.
- ◆ School will have a supply of wipes, clean underwear and spare uniform for this purpose. (A supply of clean underwear and spare uniforms are available in the disabled toilet on the Reception corridor)
- ◆ If a child is not able to complete this task unaided, school staff will attempt to contact the parent or emergency contact to inform them of the situation.
- ◆ If the parent or emergency contact is able to come to school within an appropriate time frame, the child will be accompanied and supported by a staff member until they arrive. This avoids any further distress and preserves dignity.
- ◆ The member of Staff who has assisted a pupil with intimate care will complete the intimate care form (Appendix 1).
- ◆ Parents will be contacted by the school office.

Child Protection/Safeguarding Guidelines

- ◆ Ensure that the action you are taking is necessary.
- ◆ Get verbal agreement to proceed
 - CARE – CONCERN – COMMUNICATE.

Pastoral Care Procedures

- ◆ Ensure the child is happy with who is changing him/her.
- ◆ Be responsive to any distress shown.

Basic hygiene routines

- ◆ Always wear protective disposable gloves.
- ◆ Seal any soiled clothing in a plastic bag for return to parents.

Providing comfort or support to a child:

There are situations and circumstances where children seek physical comfort from staff (particularly children in Early Years). Where this happens staff need to be aware that any physical contact must be kept to a minimum. When comforting a child or giving reassurance, staff must ensure that at no time can the act be considered intimate. If physical contact is deemed to be appropriate, staff must provide care which is professionally appropriate to the age and context.

If a child touches a member of staff in a way that makes him/her feel uncomfortable this can be gently but firmly discouraged in a way which communicates that the touch, rather than the child, is unacceptable. If a child touches a member of staff, as noted above, this should be discussed, in confidence with the Designated Safeguarding Lead.

Assisting a child who requires a specific medical procedure and who is not able to carry this out unaided.

- ◆ Our Administration of Medications Policy outlines arrangements for the management of the majority of medications in school.
- ◆ Parental permission must be given before any medication is dispensed in school- this form is also available from the school office.
- ◆ A small number of children will have significant medical needs and in addition to the arrangements included in our Administration of Medications Policy will have an Individual 'Care Plan'.
- ◆ This Care Plan will be formulated by the relevant medical body.
- ◆ If required, school staff will receive appropriate training.

School Responsibilities

All members of staff working with children must undertake a full DBS disclosure procedure. This includes student teachers and volunteers who may be left alone with children.

Only those members of staff who are familiar with the intimate care policy are involved in the intimate care of children.

Where anticipated, intimate care arrangements are agreed between the school and parents and when appropriate and possible by the child. Consent forms are signed by the parent and stored in the child's file. **Only in emergency would staff undertake any aspect of intimate care that has not been agreed by parents and school.** Parents would then be contacted immediately. The views of all relevant parties should be sought and considered to inform future arrangements.

If a staff member has concerns about a colleague's intimate care practice he or she must report this to the Designated Safeguarding Lead.

Guidelines for Good Practice

All children have the right to be safe and to be treated with dignity and respect. These guidelines are designed to safeguard children and staff. They apply to every member of staff involved with the intimate care of children. Young children and children with special educational needs can be especially vulnerable. Staff involved with their intimate care need to be particularly sensitive to their individual needs.

Members of staff also need to be aware that some adults may use intimate care, as an opportunity to abuse children. It is important to bear in mind that some forms of assistance can be open to misinterpretation. Adhering to the following guidelines of good practice should safeguard both children and staff.

1. Involve the child in the intimate care. Try to encourage a child's independence as far as possible in his or her intimate care. Where a situation renders a child fully dependent, talk about what is going to be done and, where possible, give choices. Check your practice by asking the child or parent about any preferences while carrying out the intimate care.
2. Treat every child with dignity and respect and ensure privacy appropriate to the child's age and situation. Care should not be carried out by a member of staff working alone with a child.
3. Make sure practice in intimate care is consistent. As a child may have multiple carers a consistent approach to care is essential. Effective communication between all parties ensures that practice is consistent.
4. Be aware of your own limitations. Only carry out activities you understand and feel competent with. If in doubt, ask. Some procedures must only be carried out by members of staff who have been formally trained and assessed.
5. Promote positive self-esteem and body image. Confident, self-assured children who feel their bodies belong to them are less vulnerable to sexual abuse. The approach you take to intimate care can convey lots of messages to a child about their body worth. Your attitude to a child's intimate care is important. Keeping in mind the child's age, routine care can be both efficient and relaxed.
6. If you have any concerns you must report them. If you observe any unusual markings, discolouration or swelling, report it immediately to the Designated Safeguarding Lead. If a child is accidentally hurt during intimate care or misunderstands or misinterprets something, reassure the child, ensure their safety and report the incident immediately to the designated teacher. Report and record any unusual emotional or behavioural response by the child. A written record of concerns must be made available to parents and kept in the child's personal file.

Communication with Children

It is the responsibility of all staff caring for a child to ensure that they are aware of the child's method and level of communication. Depending on their maturity and levels of stress children may communicate using different methods - words, signs, symbols, body movements, eye pointing, etc.

To ensure effective communication:

- Make eye contact at the child's level;
- Use simple language and repeat if necessary;
- Wait for response;
- Continue to explain to the child what is happening even if there is no response; and
- Treat the child as an individual with dignity and respect.

To be reviewed in October 2022 or sooner if required.

Appendix 1

STILLNESS INFANT SCHOOL

Parental Permission for Intimate Care

Should it be necessary, I give permission for _____ to receive intimate care (e.g. help with changing or following toileting).

I understand that staff will endeavour to encourage my child to be independent. I understand that I will be informed discretely should the occasion arise.
