There is a 'Get Ready' starting video today looking at continuing sequences that you might have your child go through first. **There are nice parts built in to pause at that the children can give a go verbally unless they wish to write anything down to support the learning. The answers are then given too.** The parts that mention the worksheet don't stay on the screen for too long. The video finishes for us on **05:10**.

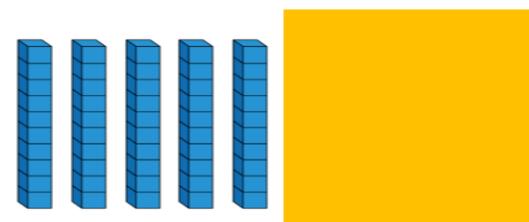

on their own using my flip chart on the screen. They can be recorded easily into their book. I will show them how. 😊

When your child completes their activities and feel like completing a further challenge below.

Some Base 10 is hidden.

The total is less than 100

What could the calculation be?

\_\_\_ × 10 = \_\_\_

Tim says it could be  $10 \times 10$

Have your child then watch my follow up video for the answers to see how they have got on. 😊

This week we will be playing:

## Sardines

**People:** 3 or more

### How to play:

- One person hides.
- All other players count to 60 together, they are the seekers.
- The seekers attempt to find the hider.
- If they find the hider, they hide with them.
- The last person to find everyone hides first on the next round.

Have you ever wanted to feel like a sardine in a tin?
