

English

We will be exploring all of our senses by reading books that focus on each sense.

We will be focusing on getting our sentences correctly demarcated with capital letters and full stops whilst writing a variety of genres: stories, information texts, recipes and letters!

Science

Not only will we be finding and identifying as many different parts of the human body as we can, we will be exploring each of the 5 main senses in detail!

Each week we'll take a main sense and through fun and exciting experiments, we'll discover how we use it to interact with the world around us.

RE

We will be looking at the responsibilities of humans on earth, and how we should all care for the world we live in. We will look closely at how Christians carry out different responsibilities within the world we live.

Later in the term we will look at other religions and how they believe the creation of the universe happened.

Maths

We'll be working on Number and Place Value, one more and one less, as well as comparing numbers to each other. We will also continue to work on correct digit formation. We will be using mathematical equipment to demonstrate our understanding of place value.

Art/DT

We will be focussing on the artist Kandinsky. The children will get to create some lively pieces of art by painting the sounds and colours they hear while listening to inspirational music. The children will also be cooking some delicious porridge to smell and taste!

Music

Our Music Unit this half term is "Hey You!" Hey You! is written in an Old-School Hip Hop style for children to learn about the differences between pulse, rhythm and pitch and to learn how to rap and enjoy it in its original form. As well as learning to sing, play, improvise and compose with this song, children will listen and appraise other Old-School Hip Hop tunes.

We shall also be introducing the Glockenspiel for instrumental work.

Computing

We will be getting the children to think about what objects have computers inside them and what uses they are put to, before starting to investigate algorithms by programming Beebots to cross increasingly tricky courses!

Enrichment

We will have a wonderful workshop from a crazy scientist to kick off our Super Senses topic! We will also be embracing harvest time by thinking about and donating to food banks. We are excited to complete a blindfolded barefoot walk in our nature garden with the help of Zara! And begin our plants and tree observations!

PE

The children will have two sessions of PE a week: Fundamentals and Target Games. These will give them the skills we'll be building on for the rest of the year.

AUTUMN TERM 1 SUPER SENSES!

Unifying Question:

Which is the most important sense?
